Fondata nel 1925 come "Alluminio Paderno" e specializzata nella produzione di pentole in alluminio per il settore casalingo, Paderno è attualmente un marchio leader a livello mondiale nella fabbricazione e commercializzazione di pentolame professionale e articoli da cucina per la ristorazione e per l'industria dell'ospitalità.

Nel 1997, in seguito all'acquisizione di Sambonet da parte di Paderno s.r.l. nasce Sambonet Paderno Industrie S.p.A.. Sambonet rappresenta dalla metà dell'ottocento l'eccellenza italiana, a livello internazionale, nella produzione di posateria e vasellame argentato e in acciaio inox dagli stili più classici fino alle sperimentazioni di design.

Paderno e Sambonet approdano nel 2001 a Orfengo (Novara), costituendo il quartier generale del Gruppo in un nuovo e moderno stabilimento firmato dall'Architetto Enrico Frigerio. Nell'azienda si concentrano non solo le attività produttive, il magazzino, un moderno laboratorio, ma anche gli uffici, lo showroom, l'outlet e un'area ricreativa dedicata ai dipendenti.

Nel 2009, con l'acquisto della prestigiosa società tedesca Rosenthal, Sambonet Paderno Industrie S.p.A. arricchisce il proprio portafoglio marchi (Sambonet, Paderno e Arthur Krupp) integrandolo con prestigiosi brand del settore della porcellana come Rosenthal, Thomas e Hutschenreuther. Il Gruppo italiano è ora leader nella produzione di articoli di design di alta qualità per la tavola e la cucina destinato a soddisfare tutte le esigenze dei canali Ho.Re.Ca. e dettaglio.

I prodotti Paderno sono distribuiti attraverso rivenditori specializzati in tutti i comparti della ristorazione Ho.Re.Ca. (come ristoranti, fastfood, alberghi e comunità, ospedali, navi da crociera ed enti militari). Forte di oltre 80 anni di storia con la sua presenza capillare in tutto il mondo, Paderno si propone internazionalmente come un punto di riferimento indispensabile per tutti i professionisti della ristorazione. Gli articoli di produzione sono inoltre affiancati da un'importante gamma di prodotti complementari e affini accuratamente selezionati e realizzati da ditte altamente qualificate.

Founded in 1925 under the name of "Alluminio Paderno" and specialised in the production of aluminium pots and pans for the household, today Paderno is a leading international brand in the manufacture and sale of professional cookware and kitchen items for the restaurant and hospitality industry.

The 1997 saw the set-up of Sambonet Paderno Industrie S.p.A., following the acquisition of Sambonet by Paderno s.r.l.. Since the mid-nineteenth century, Sambonet has been a standard-bearer for Italian excellence throughout the world, producing flatware and holloware in silver-plated and stainless steel, from a classic to a modern and design-driven style.

In 2001, Paderno and Sambonet arrived in Orfengo (Novara), where the headquarters of the Group were set up in a new and modern plant designed by architect Enrico Frigerio. This facility houses not only the factory, the warehouse and a modern laboratory, but also the showroom, the outlet store and a recreation area for staff.

In 2009, the acquisition of the prestigious German company Rosenthal permits Sambonet Paderno Industrie S.p.A. to enhance its brand portfolio (Sambonet, Paderno and Arthur Krupp) with the addition of leading names in the porcelain sector, such as Rosenthal, Thomas and Hutschenreuther. The Italian Group now plays a leading role in the production of top-quality items for the tabletop and the kitchen, aimed at covering all the needs required by the market.

Paderno products are distributed through specialised distributors in all segments of the hospitality industry (such as restaurants, fast food outlets, hotels and community facilities, hospitals, cruise ships and military bodies). The company's eighty-year history and the worldwide widespread presence makes Paderno an indispensable international benchmark for all professionals in the catering sector. A remarkable range of complementary articles, carefully selected and crafted by highly qualified companies, completes the Paderno produced collection.

PER LA CUCINA SENZA GLUTINE

Coerentemente all'ottica di servizio che contraddistingue il marchio, nasce e prende vita un nuovo progetto Paderno pensato per abbattere gli errori in cucina a salvaguardia del cliente celiaco, sviluppato e concretizzato in seguito alla collaborazione con l'Associazione Italiana Celiachia Lombardia ONLUS. Sambonet Paderno Industrie S.p.A. è stata la prima azienda del settore ad offrire al canale "fuori casa" una linea completa di articoli da destinare alla preparazione di pietanze senza glutine.

Attraverso alcuni elementi distintivi e differenzianti, come manici in PVD oro per pentole e padelle e personalizzazione con un logo specifico per utensili, tutti gli strumenti saranno facilmente identificabili in cucina. L'introduzione si pone come obiettivo:

- diminuire il rischio di accidentali contaminazioni crociate degli alimenti;
- facilitare il professionista nell'operare e nell'offrire un servizio a favore del cliente con intolleranza al glutine;
- sensibilizzare il settore sul tema "gluten free" di fronte alle nuove esigenze dei consumatori.

GLUTEN-FREE CUISINE

Consistently with the functional approach of the brand, a new Paderno project has been designed and implemented to reduce mistakes in the kitchen to the benefit of people with celiac disease. This project has been developed with the collaboration of Associazione Italiana Celiachia Lombardia ONLUS (Italian Society for the Celiac Disease - Lombardy Section). Sambonet Paderno Industrie S.p.A. is thus the first company in its industry that offers a full line of HoReCa items intended for gluten-free cooking.

Some distinguished special features, such as golden PVD handles for pans and pots and a special customised logo for utensils, will allow professionals to easily identify all these items in the kitchen. This innovation aims at:

- *reducing the risk of accidental food cross-contamination;*
- *making it easier for professionals to work and to provide services to clients with gluten intolerance;*
- *raising awareness on the gluten-free diet issue in the industry so as to respond to the new needs of consumers.*

Fornita completa di griglia e coperchio. La pratica griglia di scolo e il coperchio permetteranno di effettuare cotture di pesci di grandi dimensioni, bolliti o al forno (con griglia posta alla base del recipiente), oppure al vapore (riducendo la quantità di liquido). La forma allungata è utile anche per cuocere zamponi e musetti.

Equipped with grid and cover. The practical drainage grate and the lid are useful to easily cook large fish, to boil or bake (placing the grid on bottom of the kettle) or steam (reducing the amount of liquid). The elongated shape is also useful for cooking pig's trotters and snouts.

La crespella (in francese: crêpe) è un tipo di cialda sottile, morbida ed elastica, cotta su una superficie rovente tonda. Vengono farcite di ripieni vari, dolci o salati e arrotolate su se stesse per racchiuderli. L'impasto è a base di latte, uova, farina. La crespella è generalmente considerata una pietanza tipica della cucina francese, tuttavia sono presenti preparazioni simili in vari paesi d'Europa. Il nome proviene dal termine latino crispus (arricciato, ondulato).
The pancake (in French: crêpe) is a type of thin wafer, soft and supple, baked on a round hot surface. Usually stuffed with various fillings, sweet or salty and rolled up. The dough is made from milk, eggs and flour. The pancake is generally considered as a typical French dish, although there are similar preparations in several countries. The name comes from the Latin crispus (curly, wavy).

PADELLE FERRO

STEEL FRYING PANS

INDUCTION
READY!

Il ferro è ottimo per le cotture a fuoco molto vivo perché, non avendo un'alta capacità di trasmettere calore, evita improvvisi sbalzi di temperatura. Essendo un materiale antiaderente, evita l'attaccamento dei cibi. Sopporta temperature elevatissime e col tempo migliora il suo rendimento. I recipienti in ferro sono i più adatti per frittiture, omelette o sottili crêpes. La padella in ferro nera, va lavata con acqua il meno possibile e mantenuta sempre unta. Il ferro è il materiale ideale anche per cotture a induzione.

Iron is ideal for cooking at high temperatures because its low capacity of heat transmission prevents temperature leaps. As it is non-stick, food does not stick to it. It withstands very high temperatures and improves its performance with use. Iron pans are perfect for fried food, omelettes or fine crêpes. Wash the black iron pan in water as little as possible and always keep it greased. Iron pans are ideal also for cooking on induction hobs.

P N GHISA SMALTATA

CAST IRON COOKWARE

INDUCTION
READY!

Idonee all'uso su tutte le fonti di cottura (gas, elettriche, vetroceramica, induzione) e forni (gas, petrolio, carbone o legna) ad esclusione di microonde. Una perfetta armonia tra ghisa, smalto e alta qualità. Progettate e costruite per assorbire e diffondere il calore in modo uniforme. La ghisa è adatta a tutte le tecniche di cottura, per zuppe, arrostiti, risotti, dolci, per piatti che richiedono una lunga cottura tipo brasati e allo stesso modo ideale per carni e verdure alla griglia in quanto ne esalta sapori ed aromi in stile barbecue. La ghisa ha anche caratteristiche di antiaderenza. La temperatura elevata della padella cauterizza la superficie della carne. Tutto il sapore, l'acqua e i valori nutrizionali rimangono sigillati nel cibo. Nella cottura in casseruole, il vapore generato grazie al particolare design del coperchio si condensa ricadendo e mescolandosi nuovamente nel cibo non solo trattenendo sapori e aromi ma fornendo la miglior protezione alle sostanze nutrienti e contribuendo ad una dieta sana. La ghisa è un materiale riciclabile al 100% e quindi ecologico. Inoltre, grazie alla sua capacità di mantenere il calore per lungo tempo consente un notevole risparmio di energia permettendo di cuocere a fuoco basso. Anche a tavola mantengono in cibi in temperatura. La ghisa mantiene però il caldo come pure il freddo... può essere usata per mantenere il cibo fresco. Riposta per un breve periodo in frigorifero, mantiene il cibo fresco nelle calde giornate estive e ideale per servire insalate di pasta, riso, farro, ecc., ecc. Pratica e facile da pulire. Queste casseruole e padelle in ghisa sono lavabili in lavastoviglie merito della speciale tecnologia applicata al metodo di smaltatura. Manicatura e pomoli dal design ergonomico sono in ghisa e inox. Durante la cottura si raccomanda di maneggiare con un panno consistente e asciutto.

Suitable for use on all cooking hobs (gas, electric, ceramic, induction) and ovens (gas, oil, coal or wood) except microwave. A perfect harmony of cast iron, enamel and high quality. Designed and constructed to absorb and spread the heat evenly. Cast iron is suitable for all cooking techniques, for soups, roasts, rice, desserts, for braise that require a long cooking and likewise ideal for meats and grilled vegetables as it enhances flavors and aromas like barbecue style. Cast iron also features non-stick. The high temperature of the pan sears the meat surface. All the flavor, water and nutritional values remain sealed in the food. When cooking in casseroles, the steam generated thanks to the special design of the cover condenses falling back into the food not only retaining flavors and aromas but providing the best protection for nutrients and contributing to a healthy diet. Cast iron is a material 100% recyclable and therefore environmentally friendly. Moreover, thanks to its ability to retain heat for a long time it allows a considerable saving of energy. With closed lid on the table, the pot will preserve the temperature for a second serving. Cast iron retains the heat but as well the cold... can be used to keep the food fresh. Stored for a short time in the refrigerator, keeps food cool during hot summer days, ideal for serving pasta or rice salads, etc. Practical and easy to clean. These cast iron pots and pans are dishwasher safe thanks to the special technology applied to their enameling method. Ergonomic knobs and handles made of cast iron and stainless steel, suitable for use on all heat sources and ovens except microwave. Be careful, they heat up during cooking, it is recommended to handle with a dry thick cloth.

I soufflé, piatto tipico della cucina francese, sono delle preparazioni, dolci o salate, cotte al forno e composte da un impasto di burro, farina, latte e tuorli d'uova, il tutto unito ad albumi montati a neve. La preparazione dei soufflé, non è complessa, la fase più critica per la buona riuscita della ricetta è la cottura: i soufflé devono risultare soffici e belli gonfi.

Soufflé is a typical French dish. It can be sweet or savory, the basic mixture is made of butter, flour, milk and eggs. Soufflé recipes are actually quite easy and simple to prepare. The most critical part for the success of the recipe is cooking. The soufflé should be soft and beautifully puffed.

La grigliatura degli alimenti è uno dei metodi di cottura più antichi: è semplice, veloce e dona alle pietanze un sapore caratteristico, ottimale per tutte le preparazioni, carne, pesce e verdure. Ideale per le preparazioni in grande quantità per catering e nella banchettistica, party/feste open-air. Quando la carne viene posta sulla griglia, il calore accumulato fa sì che i pori si chiudano immediatamente, garantendo così una perdita di succhi e peso molto limitati.

Grilling food is one of the oldest methods of cooking, simple and fast it gives a distinctive flavor to dishes, suitable for all preparations, whether meat, fish or vegetables. Ideal for preparation in large quantities for catering and banquets, meals/open-air festivals. When the meat is placed on the grid, the heat stored immediately closes the pores, thus guaranteeing a very poor loss of juice and weight.

Gli Spätzle sono una preparazione tipica della Germania meridionale. Si tratta di gnocchetti a base di farina di grano tenero, uova e acqua. Gli Spätzle hanno una caratteristica forma a goccia che si ottiene con un apposito attrezzo chiamato spätzlehobel: una grattugia formata da una base bucherellata sulla quale scorre un recipiente contenente l'impasto che viene fatto scorrere avanti e indietro. L'impasto cola attraverso i buchi e viene tagliato dal carrellino, le gocce cadono nell'acqua bollente e riemergono in superficie quando sono cotte. Dopo essere stati lessati, gli Spätzle vengono ripassati nel burro e serviti come primo piatto o come contorno. - Spätzle are a typical preparation of southern Germany. These are dumplings made from wheat flour, eggs and water. Spätzle have a characteristic shape of a drop which is obtained with a special tool called spätzlehobel: a grater formed by a perforated base on which slides a basin containing the mixture. The mixture drips through the holes, the drops fall into the boiling water and re-emerge to the surface when they are cooked. After being boiled, the Spätzle are heated up in butter and served as a first course or as side dish.

La parola giapponese per le bacchette "Hashi" significa "ponte". A differenza delle bacchette cinesi, che sono squadrate e nella parte terminale smussate, quelle giapponesi sono arrotondate e rastremate all'estremit  (molto pi  difficili da usare). Questo sembra per facilitare la rimozione delle lisce dal pesce alla base della dieta giapponese. - *The Japanese word for chopsticks "Hashi" means "bridge". Unlike Chinese chopsticks, which are squared-off and blunt at the end, these Japanese utensils are rounded and tapered to a point at the end (much more difficult to use). It has been suggested that this is in order to facilitate the removal of bones from fish, which makes up a great part of the Japanese diet.*

La griglia sul wok mantiene in caldo il cibo che ha terminato la cottura, mentre l'olio cola nel wok. - *The tempura rack attached to the wok holds food that has finished cooking, so that it stays warm while oil drains back into the wok.*

La tempura è un piatto tipico della cucina giapponese che consiste in un fritto croccante e leggero, fatto di verdure e pesce. Il nome deriva dal termine latino "tempora" che indica quattro periodi dell'anno corrispondenti alle quattro stagioni; in questi frangenti di tempo i cristiani evitavano di mangiare carne, nutrendosi solo di pesce e verdure. Si narra che, durante il XVI secolo, alcuni missionari portoghesi giunsero sino in Giappone e qui fecero conoscere al popolo del Sol Levante la tradizione dei tempura; consuetudine che fu poi personalizzata dai giapponesi che iniziarono a friggere verdure e pesce con una pastella leggera. - *The tempura is a typical Japanese dish consisting in fried vegetables and fish, crispy and light. The name of this food comes from the Latin term "tempora" indicating four periods of the year corresponding to the four seasons during which Christians abstain from eating meat, eating only fish and vegetables. The story goes that during the sixteenth century, Portuguese missionaries arrived in Japan and taught the people of the Rising Sun the tradition of tempura. Later on this dish has been customized by the Japanese who began to fry vegetables and fish with a light batter.*

Balti e karahi sono lo stesso stile di cucina, originario del Kashmir, dove le pietanze al curry sono realizzate in una padella in ghisa con fondo arrotondato e due maniglie, simile ad un wok cinese. Spezie tipiche utilizzate sono: anice, cardamomo, corteccia di cassia, chiodi di garofano, coriandolo, cumino, finocchio, zenzero e una miscela di spezie chiamata garam masala. Spesso questi pasti vengono consumati senza riso o posate, utilizzando un pane indiano detto naan. *Balti and karahi are the same style of cooking, originating in Kashmir, where the curries are made in a cast-iron pan with a rounded bottom and two handles, rather like a Chinese wok. Typical spices used in balti curries are aniseed, cardamom, cassia bark, cloves, coriander, cumin, fennel, ginger and the spice blend called garam masala. Balti curries are often eaten without rice or cutlery, using large, flat breads such as naan.*

Queste padelle piane sono utilizzate nella cucina indiana, per focacce e tutto ciò che ha bisogno di cottura rapida ad alta temperatura. L'anatra di Bombay a volte viene cucinata su tawa. CURIOSITA': L'anatra Bombay o bummalo, nonostante il nome, non è una papera, ma bensì un pesce. E' originario delle acque tra Mumbai (ex Bombay) e Kutch nel Mar Arabico. - These flat pans are used in Indian cooking, for chapattis and anything that needs quick cooking at high temperatures. Bombay duck is sometimes cooked on a tawa. The Bombay duck or bummalo is, despite its name, not a duck but a lizardfish. It is native to the waters between Mumbai (formerly Bombay) and Kutch in the Arabian Sea.

COLTELLI SUSHI GIAPPONESI P

JAPANESE SUSHI KNIVES

Una scelta eccellente per la preparazione di sushi e verdure. Lame in acciaio inox, molibdeno e vanadio, per un'ottimale tenuta del filo, affilatura a rasoio, manici in legno antiscivolo. Secondo la tradizione giapponese l'affilatura è unilaterale ed il filo è molto più sottile rispetto a quello della normale affilatura dei coltelli occidentali. Questo rende i tagli più nitidi ed evita di creare traumi alla trama delicata di carne e pesce crudo. Non utilizzare per il taglio di solidi incluse grosse lische di pesce. Data la particolarità dell'affilatura e dell'acciaio impiegato si consiglia vivamente di lavare a mano ed asciugare immediatamente con cura le lame.

Excellent choice when preparing sushi and vegetables. Molybdenum/Vanadium s/s blades for excellent edge retention, razor sharp edges, slip resistant wooden handles. The blades are sharpened with the traditional Japanese single bevel to improve sharpness. The large beveled one-sided edge is much thinner than a two-sided edge. This thinner, sharper edge makes for cleaner cuts through the soft flesh of fish, in particular. Using these knives will avoid bruising the delicate texture of raw fish and destroying the freshness of the fish. The thinner edge is more fragile than the edge on western knives. Do not use for cutting anything solid including larger fish bones. Due to the special blade sharpening and s/s used we highly recommend to only hand wash and dry the blades thoroughly immediately.

Supporto alveolare per cottura di filoni crudi surgelati.

Queste griglie amovibili in fibra di vetro siliconata sono state appositamente progettate per la cottura di pasta cruda surgelata. La loro struttura particolare permette di evitare la penetrazione della pasta nelle maglie al momento dello scongelamento e della lievitazione. Gli alveoli si inseriscono facilmente nell'intelaiatura senza agganci. Sono, inoltre, leggere da maneggiare. Non si deformano nel tempo e permettono di ottenere delle baguettes ben tonde.

Baking sheet for deep-frozen French loaves.

These flexible fluted trays of fiberglass and silicone are especially effective for baking frozen dough. Their particular structure prevents the dough from sticking to the fibers during defreezing and rising. The flutes naturally remain stable on the frames, without the need to be stapled onto them. The trays are light to handle. The flutes of the trays will not lose their shape over time, allowing you to always bake perfectly rounded baguettes.

NORME D'USO E MANUTENZIONE DELLE TEGLIE

Importante: Indipendentemente dal tipo di materiale, tutte le teglie piane non vanno mai infornate vuote.

Teglie in lamiera bluita (ferro blu)

I prodotti vengono forniti oleati in modo tale che in condizioni normali di imballaggio, trasporto, manipolazione e immagazzinaggio non presentino fenomeni di corrosione per un periodo non superiore a 3 mesi. Prima dell'uso vanno messi nel forno a 150°C per mezz'ora in modo tale da eliminare l'olio industriale di protezione. Dopo l'uso devono essere mantenuti sempre oleati e conservati in luoghi asciutti, soprattutto se utilizzati saltuariamente e deve essere evitato il contatto con sostanze acide. Sconsigliato l'uso in cella di lievitazione e surgelazione. Per la pulizia utilizzare un panno morbido oleato. Sconsigliato il lavaggio con acqua e soluzioni caustiche.

Teglie in lamiera alluminata

Devono essere mantenute oleate ma essendo la lamiera trattata e rivestita di alluminio presentano una maggiore resistenza all'ossidazione. Prima dell'uso vanno messe nel forno a 150°C per mezz'ora in modo tale da eliminare l'olio industriale di protezione. Possono essere utilizzate in cella di lievitazione e surgelazione. Per la pulizia utilizzare un panno morbido oleato. Sconsigliato il lavaggio con acqua e soluzioni caustiche.

Teglie in alluminio

Non presentano particolari problemi di mantenimento. Le caratteristiche meccaniche dell'alluminio possono alterarsi ad una temperatura superiore ai 300°C, solitamente non raggiunta dai forni. Per la pulizia utilizzare un panno morbido inumidito.

Teglie antiaderenti

Per la pulizia utilizzare il getto d'aria o delle spazzole di nylon morbide. Non graffiare il rivestimento con attrezzi metallici o spazzole abrasive in quanto le incisioni possono dar luogo a permeazione ed in seguito a corrosione. Non mettere gli stampi vuoti nel forno di cottura a temperature superiori a 200°C. Questa temperatura rappresenta il limite di resistenza termica della resina. Oltre a tale temperatura il rivestimento rammollisce sensibilmente portando ad un decadimento rapido delle caratteristiche di antiaderenza. Non lavare le teglie con pulivapor ad alta pressione e non utilizzare soluzioni caustiche. Per la pulizia utilizzare panni morbidi inumiditi.

BAKING SHEET USAGE AND MAINTENANCE INSTRUCTIONS

Important: Quite apart from the material baking sheets are made of, never put them empty in the oven.

Blue steel baking sheets

Blue steel baking sheets are supplied oiled, in order to prevent corrosion for a period of about 3 months under normal packing, transport, handling and stocking conditions. Before use, put them at 150°C in the oven for half an hour, in order to eliminate the protective industrial oil. After usage keep them oiled and dry-stored, mainly if sporadically used. Keep away from acid substances. We suggest not use them in leavening or freezing cells. Clean with an oiled soft cloth. Do not wash with water and caustic solutions.

Alusteel baking sheets

Alusteel baking sheets should better kept oiled but, thanks to the special aluminium coating they show a higher resistance against oxidation. Before use, put them at 150°C in the oven for half an hour, in order to eliminate the protective industrial oil. They can be used both in leavening and freezing cells. Clean with an oiled soft cloth. Do not wash with water and caustic solutions.

Aluminium baking sheets

Aluminium baking sheets do not need any special maintenance. Aluminium mechanical features can alter at a temperature above 300°C, which is usually not reached by common ovens. Clean with a moist soft cloth.

Non-stick baking sheets

Clean with air-jet or soft nylon brushes. Do not scratch the coating with metallic utensils or abrasive brushes, because scratches can lead to permeation and subsequently corrosion. Do not put empty sheets in the oven at 200°C or more. This is the border-line temperature for the resin thermal resistance. Moreover, at such a temperature the coating softens and this causes a faster decline of non sticking features. Do not wash the baking sheets with high pressure pulivapor (steamer) and avoid contact with caustic solutions. Always clean them with a moist soft cloth.

SERIE 18000 P

COLTELLI SERIE TRANCIATA
SHEAR KNIVES

La linea di coltelleria professionale "CCS" – Color Coding System riduce i rischi di contaminazione incrociata grazie all'utilizzo di un Sistema di Codifica dei Colori che identifica ogni coltello per un uso specifico e permette di individuare facilmente le diverse aree di lavoro. Gli acciai utilizzati per questa linea di coltelleria presentano un'eccezionale durezza ed elevata resistenza alla corrosione, grazie all'uso del sistema ICE-HARDENING, processo speciale per temprare l'acciaio. Per ogni articolo sono riportati i colori del manico in cui si rende disponibile, nonché le dimensioni delle rispettive lame. Il codice indicato nelle tabelle (es. 18000-16) si riferisce al manico in colore nero. Il codice del manico colorato si ottiene sostituendo il trattino con la lettera corrispondente al colore, da ricercarsi nella legenda. Se ad esempio si vuole ordinare un coltello con il manico rosso, la lettera corrispondente è la "R" e il codice di riferimento il 18000R16.

The professional cutlery line "Color-Line" helps to reduce the risk of cross contamination using a Color Coding System which identifies each knife with a specific task: different food processing areas are easily identified.

The steel used for this cutlery line has exceptional hardness and very high resistance to corrosion due to ICE-HARDENED system, a special process to harden the steel.

The colors of the handle for each article are indicated, as well as the dimensions of the respective blades.

The reference in the descriptions (ex. 18000-16) refers to the handle in black color.

The code of the colored handle is given by replacing the hyphen with the corresponding letter of the color, please see the key.

For instance if you would like to order a knife with the red handle, the corresponding letter is "R" and the reference is 18000R16.

Santoku è un coltello di origine giapponese tra il trinciante (coltello da cuoco) ed il coltello da verdure. La parola Santoku significa "tre virtù", infatti si adatta benissimo a tre tipi di alimenti da tagliare: carne, pesce e verdure, questa caratteristica lo rende in assoluto il coltello più universale in cucina. Le speciali scanalature e la dentellatura sottile sul retro della lama conferiscono al coltello una perfetta e più lunga tenuta di filo ed un'ottima ventilazione durante il taglio. La lama può essere riaffilata normalmente mantenendo le caratteristiche conferite dalle scanalature.

The Santoku knife is a general-purpose kitchen knife originating in Japan. The word santoku loosely translates as 'three virtues' or 'three uses', a reference to the three cutting tasks the knife performs well: slicing, dicing, and mincing. The special grooves and slim serration on the back side of blade make this knife very sharp and easy to cut and allow good ventilation while slicing (non-stick). The knife can be sharpened on both sides, retaining serration and more efficient long lasting sharpness.

AFFILATURA

Acciaino e pietra per affilare, due utensili indispensabili per la buona manutenzione dei coltelli. Per ottenere una corretta affilatura, occorre mantenere un angolo costante di 15-20 gradi tra la lama e il mezzo affilante durante l'operazione.

ACCIAINO

L'acciaino serve a correggere e mantenere l'affilatura dei coltelli. Esso riallinea le molecole che compongono il bordo tagliente, che sono state spostate dagli urti continui, "ripristinando" l'affilatura. L'acciaino tradizionale è di forma tonda, molti chefs usano però un acciaio ovale in quanto la forma più larga permette un movimento di affilatura più ampio ed efficiente. L'acciaino diamantato è invece particolarmente efficace per riaffilare coltelli a lama liscia e può ripristinare un filo di un buon coltello con 6 fino a max 10 movimenti.

SHARPENING

Sharpening steel and stone, two indispensable utensils for the knives' good maintenance. To operate a correct sharpening a constant angle of 15°-20° must be kept between the blade and the sharpening utensils during the operation.

SHARPENING STEEL

The sharpening steel is useful to correct and maintain the knives sharpening. It readjusts the molecules that are the basis of the cutting edge, that have been shifted by the usage. The traditional sharpening steel is round shaped, lots of chefs use anyway an oval shaped one, because the larger shape enables a wider and more efficient sharpening movement. The diamond sharpening steel is particularly indicated for knives with flat blade and can renew a good knife's edge with just 6 to a maximum of 10 movements.

PIETRA ABRASIVA

L'affilatura vera e propria si esegue con la pietra abrasiva, composta di solito da ossido di alluminio o da carburo di silicio e deve necessariamente essere immersa in acqua prima dell'utilizzo, per garantire la sua lubrificazione durante l'uso. Esistono differenti tipi di pietra, identificate da livelli di grana diversi (grossa, media, fine), da utilizzare in relazione allo stato della lama: una pietra con grana fine (1000 grit) si utilizzerà per perfezionare l'affilatura, la grana grossa (300 grit) per un coltello che abbia perduto completamente il filo.

Procedimento di affilatura

Posizionare la pietra abrasiva con il suo supporto in gomma antiscivolo sul piano di appoggio.

Scegliere l'angolo di affilatura (per i coltelli da cucina di uso comune 15-20°).

Applicare un movimento continuo, circolare o alternato alla lama sulla pietra, facendo attenzione a mantenere costante l'angolo di affilatura e a mantenere la lama sempre a contatto con la superficie della pietra.

ABRASIVE STONE

The true sharpening is done using the abrasive stone, usually composed by aluminium oxide or by silicon carbide and must absolutely be rinsed in water before usage in order to guarantee its lubrication during work. There are several types of stone, identified by different grains (coarse, medium, fine) that have to be used according to the blade condition: a stone with fine grain (1000 grit) will be used to improve the sharpening, a coarse grain (300 grit) for a knife that has completely lost the cutting edge.

Sharpening procedure

Placing the abrasive stone with its no-sliding rubber support on the standing surface.

Choose the sharpening angle (for commonly used kitchen knives 15°-20°).

Move the stone on the blade with a continuous, circular or alternate movement, carefully maintaining the same sharpening angle and always keeping the blade in touch with the stone surface.

Il polipropilene è un materiale idoneo per il contatto con sostanze alimentari. Non cede odori e sapori anomali agli alimenti ed è facilmente lavabile e sanificabile dopo il suo utilizzo. I contenitori isotermitici sono ideali per proteggere gli alimenti da sollecitazioni di tipo meccanico grazie allo spessore ed alla struttura a cellula chiusa; sono leggeri e privi di sporgenze e spigoli vivi per tutelare la sicurezza degli operatori durante le operazioni di movimentazione e trasporto. Resistenti, igienici, ecologici e riciclabili al 100%, sono compatibili al lavaggio e alla disinfezione industriale con detergenti e disinfettanti, acqua calda e vapore umido fino alla temperatura di 110°C (HAACCP System). Sono idonei a proteggere gli alimenti da sollecitazioni termiche grazie alle proprietà coibenti del polimero espanso il quale possiede un coefficiente di resistività (Lambda) di 0,039 W/mk e garantisce una caduta termica di 1,5-2,5°C/H/contenitore.

The polypropylene is certified as material suitable for contact with food. It does not hand over odours or flavours to foods and it is easy to wash and disinfect after use. The isothermal containers, entirely made of closed-cell expanded polypropylene, are ideal to protect food from mechanical stresses; they are light and free of protrusions and sharp edges in order to guarantee the operators' safety during handling and transport operations. They are resistant, hygienic, economic, 100% recyclable, suitable for industrial washing and disinfection with detergents and disinfectants, hot water, and wet vapour up to a temperature of 110°C (HACCP System). These containers are suitable to protect food thermal stresses thanks to the insulating properties of the expanded polymer which has a resistivity coefficient (Lambda) of 0.039 W/mk and guarantees a thermal loss of 1.5-2.5°C/H/container.

Strumento indispensabile per il sommelier che deve verificare la correttezza della temperatura di servizio del vino. Il termometro si può utilizzare inserendolo direttamente nel collo della bottiglia quando è piena, ma per misurare la temperatura del vino è preferibile farlo pescare direttamente nel bicchiere da degustazione, perché il vino versato nel bicchiere ha una temperatura superiore rispetto a quello in bottiglia. - A useful tool for the sommelier who must verify the serving temperature of wine. MACINE
MILLS

I prodotti Peugeot sono curati nei minimi particolari per offrire macine adatte a più usi e per diverse spezie. La maggior parte degli articoli sono macinasale e macinapepe, ma non si devono dimenticare anche altre macine tra le quali quella per la noce moscata e per il caffè. Le macine sono fornite con spezie.

Peugeot products are made with care for details, they offer mills suitable for multiple uses and for different spices. The most part of these items are salt mills and pepper mills but it is worth adding other mills such as for nutmeg and coffee. Mills are supplied with spices.

MACINA NOCE MOSCATA

La macina per la noce moscata Peugeot è dotata di una doppia lama/grattugia e di un dischetto uncinato a pressione che permette di grattugiare la noce moscata molto finemente.

MACINAPEPERONCINO

Il macinapeperoncino possiede un sistema di pre-taglio e un meccanismo che permettono di macinare il peperoncino secco.

MACINASALE

Il macinasale per il sale Peugeot è disegnato per macinare sale marino grosso. Realizzato in acciaio inossidabile, è protetto dalla corrosione salina.

MACINAPEPE

SPICES

The Peugeot spice mechanisms provides high performances for grinding spices and dried aromatic herbs such as basil, thyme, parsley, cumin, coriander seeds, etc.

NUTMEG MILL

CHILI PEPPER MILL

The chili pepper mill has a pre-cutting system and a mechanism that enables dry chili peppers to be ground.

SALT MILL

The Peugeot salt mechanism is designed to grind dry large crystals of salt. Made from stainless steel it is protected against salt corrosion.

PEPPER MILL

The pepper mechanism is equipped with a helix-shaped double row of teeth that guide and hold the peppercorns for a perfect grind.

Sistema brevettato che permette una regolazione predefinita della macinatura.
Patented system that enables precise grind adjustment settings.

6 Livelli di macinatura del pepe.

Cocktail Master

art.
41484-00

Principi di densità.

Per i cocktail analcolici il contenuto di zucchero dei vari liquidi determinerà la differenza di densità. Bagnare il galleggiante prima dell'uso. Versare a uno a uno i liquidi nel cocktail master, dal più dolce al meno denso, per ottenere un fantastico cocktail multicolore.

Density principles.

For alcohol-free drinks the density difference depends from the quantity of sugar of each liquid. Wet the float before use. Pour the liquids one after another in the cocktail master from the sweetest to the less dense, to get fantastic multicolored cocktails.

Un sistema sorprendente per preservare i vini e mantenerne integro l'aroma. Maneggevole e facile da usare. Estrae l'ossigeno bloccando il processo di ossidazione. Fornito con 2 tappi in silicone, riutilizzabili. Un must per gli amanti del vino - *An amazing new way to preserve wines. It pumps out the oxygen that turns open bottles of wine into vinegar. Just place the pump over the reusable stopper and, in one simple step, draw all the air out of the bottle and vacuum seal it to enjoy another day. A must for the wine lover! Easy to use and handy for keeping the bloom on your favorite vintage.*

FRAME BUFFETSYSTEM

BY MICHAEL SIEGER / sieger design

Gli elementi che compongono il sistema sono modulari, rendendo la composizione estremamente versatile. La natura impilabile di ogni elemento consente uno stoccaggio efficiente, ottimizzando lo spazio. Le strutture porta ciotole sono impilabili sia senza che con le ciotole. Tutti gli elementi del sistema sono veloci e semplici da utilizzare, facili da impugnare sotto gli inserti (tagliere, inserto porta ciotole, vassoi, ecc.) come pure sotto la base dei moduli stessi anche quando sono impilati. Le strutture in acciaio inox ad esempio possono essere utilizzate anche senza inserti come letto per contenere ghiaccio per la presentazione di composizioni di frutti di mare o altri alimenti. Le strutture porta ciotole in acciaio inox sono costruite con una doppia parete permettendo al cibo di mantenere la temperatura più a lungo.

The system elements feature a modular construction, making them extremely versatile. The stackable nature of every element enables space-efficient storage. Bowl boxes can even be stacked with or without bowls. All the system elements are quick and simple to use, with easy-to-grip edges both underneath the cover panels and underneath the base modules themselves. Cool plates can be used without modular cover panels for a bed of crushed ice. Stainless steel bowl boxes are not only attractive but also insulated, allowing food to maintain its temperature for longer.

SCULTURE GHIACCIO - ICE SCULPTURES

Stampi riutilizzabili per sculture di ghiaccio in speciale materiale plastico con l'aggiunta di uno strato esterno di resina arancione che conferisce ai due gusci più elasticità e resistenza durante l'espansione del ghiaccio. La guarnizione siliconica posizionata all'interno del guscio ed il sistema di fissaggio composto da un kit di volantini non permettono la fuoriuscita dell'acqua. Si consiglia di riempire lo stampo con acqua e piccoli pezzetti di ghiaccio. Per ottenere una scultura più trasparente è consigliabile prolungare il processo di congelazione. La temperatura ottimale è tra i -10°C e -20°C. Prima di aprire lo stampo lasciare a temperatura ambiente per 10 minuti. Aprire lo stampo quando si trova in posizione orizzontale. Estrarre la scultura dallo stampo, rimuovere il ghiaccio in eccesso con l'aiuto di un cutter, pulire e lucidare la scultura con un cannello e/o un panno.

Reusable moulds for ice sculptures made of special plastic with an additional external orange coating of resin which makes the two shells more elastic and more resistant against ice expansion. The silicone trimming inside the shell and the fixing screws do not let the water come out. We suggest to fill the mould with water and small ice cubes. In order to obtain a more transparent sculpture we suggest to prolong the freezing process as much as possible. Recommended temperature between -10°C and -20°C. Before opening the mould leave it at room temperature for 10 minutes then open the mould horizontally on a table and extract the sculpture. Remove exiding ice with a cutter and polish the sculpture with a mini torch and/or a cloth.
